nordlux®

2024 Collection

Nordlux' 2024 lighting collection includes our carefully selected designs based on trends, tradition and technology. This year, we are including fewer but better products in all of our lighting categories. Common to them all is our ongoing desire to create products you want to bring home.

For our **decorative** assortment, we are proud to reintroduce a classic design, Model 2110, originally designed in the 90s and now reborn in four modern colours. We are also expanding some of our most popular series, including our lighting range for the children's room, where we have added new, cute designs and vibrant colours.

Our new **outdoor** additions have been crafted in durable materials and designs that are made to last for many years. We are proud to introduce an extensive range of outdoor lighting in our unique "Designed For Seaside" coating, which has an unprecedented 10-year guarantee, setting a new standard in durability even for painted outdoor products.

For 2024, we have significantly expanded our **functional** batten assortment with several new items for both indoor and outdoor use. We are also introducing some new, beautiful designs in our Art Deco style, which bring both elegance and convenience to your bathroom.

We proudly present our 2024 collection.

Functional

Our full range of functional lighting combines beautiful design with the newest LED technology for your bathroom, hallway, garage and more.

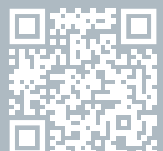

Bathe In Light

Bathroom lighting is a category with very specific safety regulations. Wet areas with moisture, steam and flowing water require very strict lighting regulations.

Our "Bathe in Light" concept combines all safety regulations for the different zones in the bathroom with the newest LED technology such as our Moodmaker™ function. Moodmaker™ allows you to shift between functional and relaxing light, for example by switching to a dim night light when visiting the bathroom during the night.

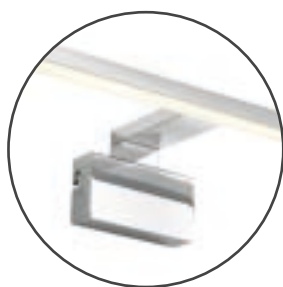

As part of our "Bathe in Light concept", we also have developed products with high colour rendering index (RA/CRI90), providing a natural light that is very close to sunlight. With this light, skin tones and colours are accurately reproduced, which is important when applying makeup and getting ready in the bathroom.

Fold 15 2019051003

"Fold a sheet of paper, place a bulb behind - and you have a lamp." Although reality is not that simple, designer Henrik Bønnelycke wants the light to appear as if it is. In terms of shape, Fold is brightly clear, where the selected details and latest LED technology are in focus. The magnetic shade makes the installation simple and the design distinct without visible screws. The light shines up and down, and the four included light patterns change the light based on desire and personal style and are also an element for light dimming.

Dark Sky Protection

In recent years, we have seen a tendency of various negative effects of too much artificial light at nighttime.

The excess light can come from streetlights, industrial buildings or regular outdoor lighting and causes negative effects on humans, animals and plants and furthermore obstructs the view of the stars in the night sky.

At Nordlux, our vision is Lifting people's quality of life with light.

Therefore, we want to contribute to protecting the dark skies as much as possible. We offer a wide range of "Dark Sky Protection" outdoor lighting that faces downwards – carefully aiming and directing the light beam only where it is needed.

What is FSCTM?

We focus on protecting our resources and the environment. This is one of the reasons why we have been FSC certified since 2016. FSC certification is about using trade forest products such as wood and paper from responsible sources, and ensuring clear traceability for the wood – all the way from forest to the finished product in the shop.

Responsible sources refers to local populations, animals and plant life being taken into consideration, that logging is done in an environmentally appropriate way and that the deforested areas are replanted.

The desire and motivation for FSC certification of the products which include wood is a natural continuation and development of our approach to environment and sustainability – and we will continue to demand FSC certified wood for those of our design products that include wood.

We see sustainability as a task involving everyone associated with Nordlux – from the owners, board and management to employees and suppliers.

*FSCTM stands for Forest Stewardship CouncilTM and is a recognised international non-profit labelling scheme for wood and paper.

FSC certification ensures responsible forest management and improved living conditions for the local population in forests worldwide.
